

**Featured:** One of three Max Air consoles used for sports broadcasting - Mobile TV Group - USA

# On The Road With Euphonix

Compact yet powerful, the Euphonix Max Air, a high-performance digital audio mixing system is specifically designed for on-air and live-to-tape broadcast production. The Max Air is easy to learn and fast to operate, its innovative center touch-screen simplifies all master functions, while its modular surface design offers a rich digital

feature set and advanced technology. The system's 100% redundant DSP SuperCore expands to over 300 channels yet the overall system remains lightweight and competitively priced making it the ideal console for any OB truck. With over 100 broadcast facility installations worldwide, Euphonix remains the console of choice for the broadcast market.
